

IR8 Beeswax

100% Pure Derwent Valley Beeswax

Recipes for IR8 Beeswax

All the recipes use 1 block of IR8 Beeswax (roughly 25g). For each recipe, melt beeswax gently and safely using a double boiler (either a bowl over or a jar in a warm pan of water on a low gentle heat). Keep beeswax uncovered while melting — you don't want boiling water to condense on the lid and drip into your wax. Do not use a microwave — beeswax can easily reach the flash point and ignite. Once melted mix in the other ingredients. When they have combined pour into an appropriate container.

Lip Balm

1 Block of IR8 Beeswax
50g Coconut Oil

Optional

2 Capsules Vitamin E

Note

To make Lip Gloss use only 25g Coconut Oil and add a couple drops of essential oil
